

## POSTER CAPSULE 1600 LAMINATOR

Poster Capsule 1600 is a heavy duty Full-auto roll to roll Top-end model with ABS tooling side cover construction; Available for much pressure loaded on roller for special material application use; its entire drop down metal structure makes it much stronger. The accurate CNC metal cutting program secure align laminating and quality finishing.

Features:

- One side hand crank lift up system
- Drop in type interchangeable 3" aluminum shaft
- Equipped with 3" unwind liner paper shaft
- Membrane control panel
- Gap and pressure indicator
- Variable speed control
- Forward and reverse direction control
- E-stop and photocell installed for safety
- Both auto and foot pedal switch mode
- Thermal cut off switch in case over heat
- Pivot up feeding table
- Removable pressure plate
- Heavy duty castor with brake
- CE certified

CHARACTERISTICS	
Max. Working Width	1600 mm
Variable Working Speed	0-6 m/min
Max. Nip Opening	35 mm
Working Temp.	120°C
Alarm Temp.	150°C
Roller Diameter	120mm
Top and bottom roller material	Silicone rubber
Drive Motor	AC110V 230V/120W
Power Consumption	2380 W
Power Requirement	AC110V/50-60Hz AC230V/50-60Hz
Machine Size	2020 x 630 x 1260 mm
Shipping Dimensions	2050 x 770 x 1450 mm
Weight	340 kg
