

TEXTILE ECO-BEACH JERSEY SUBUVFR 95GR

Description:

Textile microperforated banner for large format applications (5mts).

Very light printing support that reduces weight in super large format applications facilitating a simpler and much safer installation.

The microperforated weave does not offer resistance to the wind, thus avoiding the candle effect. In addition, it offers a flag with less movement and better visualization of the printed image.

Compatible with UV printing and sublimation.

Advantages:

- Great stability.
- Avoid candle effect.
- Certificate B-s1.
- Excellent transfer (95%).

Applications:

Ideal for promotional banners or super large format signage.
