STRATUS KANTU PLUS

Description:

Self-adhesive flexible protection profile. It can be used directly from the roller to protect and close the edges of rigid printing panels. Even for tight angles and round shapes.

Available in white, black and silver gray.

10mm and 19mm thick.

• Very flexible material

• Packed in roll

• Easy to handle and apply

• Fast direct and immediate adhesion

Applications:

Ideal for protecting digital print materials, screen printing, photo montage, signage for indoor / outdoor applications, exhibitions, visual merchandising, etc.

Instrucciones de uso:

Instructions for use:

1) Take out enough profile from the blue cardboard package. The beginning of the profile is fixed with an adhesive strip at the opening of the cardboard package.

2) Cut the desired size, reattach the profile to the opening of the package.

3) Place one end on the print media to protect and mark the corners.

4) Then cut at the marked points. If you need to apply it over 90° bends, make sure the profile is free of tension at any point.

5) Finally, peel off the protective film from the adhesive tape by placing the profile at the end of the rigid panel and pressing firmly on both sides.
