

KANTÚ

Description:

PVC edge for flexible protection of rigid substrates.

Very easy to handle.

Available colours: snow white and black.

Different thicknesses available.

Thicknesses for adhesive format: 10,19,30 and 40mm.

Properties:

Profiles easily and fits snugly without chipping.

Easy to peel off if grinding is necessary.

Offers high impact protection. Absorbs impact and prevents sagging of rigid supports.

More "solid" appearance to edged parts. Disguises well any cavities in the chipboard.

Resistant to variations in climate and humidity.

Tests carried out on PVC edgebanding and calendared PVC edgebanding.

Edge banding: UNE 56843

Dimensions and tolerances: UNE 53255

Dimensional stability at high temperature: UNE 53173

Colour fastness to light: UNE 53173

Tensile strength / Elongation: UNE 53023

Density: UNE 43020

Ta de Reblandecimiento Vicat (extruded) UNE 53118

Dimensional stability 120°C on melamine edges.

Edge gluing: UNE 56843
