

COSEDORA CRONOS GO

Description:

Economical sewing station for the application of Silicone on the edge of printed fabrics, hems and contact sealing tapes.

The Cronos GO is Matic's new economical sewing station. Choose between working seated or working standing in a more ergonomic position.

The Cronos GO is the right tool for sewing SEG (Silicone or PVC Keder) applications, as well as pockets, hems and contact seams on fabrics and PVC. This twin-needle sewing machine is an added value for space-saving and cost-effective production.

Features:

- Double needle sewing head.
- Motorized feeding of the Silicone / Keder.
- Silicone / Keder cutter.
- Pocketing guides and contact sealing tapes can be added.
- Sitting or standing position.
