

Sistema Tex Up

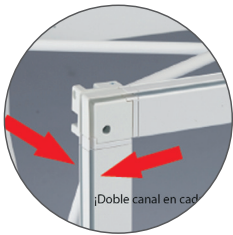

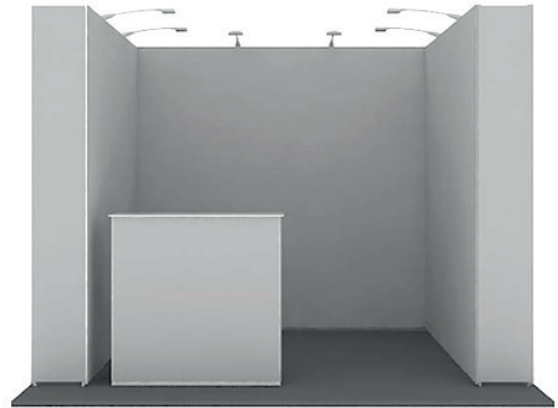

Tex Up popup is based on a principle of traditional popup frame plus invented bungee connected bars with channels fitting silicon edge textile graphic.

This invention solves many problems of conventional magnetic popups and nowadays popular velcro fabric popups, and has some main advantages:

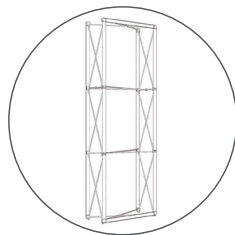

- Clean & finished textile graphic
- Easy to mount graphic
- Easy to sew textile graphic with silicon strip

Suitable for use as photocall or to expose images with high impact in all kinds of events, exhibitions, fairs, trade promotions, exhibition stands, exhibitions, information centers, receptions and sales events.

The union of several structures allows the construction of exhibition stands.
