

ADHESIVO DOBLE CARA DUPLEX PLUS

Description:

Premium mounting tape for the permanent, self-adhesive lamination of even surfaces. Very well processible, provides excellent adhesion to almost all materials with excellent flatness.

The film/adhesive combination will not materially affect the image or photograph, due to its pH neutral adhesive (other interferences between ink and photopaper to be checked separately).

Applications:

Ideal for indoor and outdoor applications, mounting in galleries, museums, photography...

CHARACTERISTICS	VALUE
Support	PET film, 12 µm, transparent
Interliner	Release paper, special coating, white, 90g/m2
Adhesive	Polyacrylic, permanent, transparent
Thickness	0.07mm
Weight	60g/m2
Adhesion on steel (after 20min)	8 N/25mm
Adhesion on steel (after 24h)	11 N/25mm
Application temperature	min. +10°C
Final temperature	De -40°C a +150°C
Shelf life	2 years
Durability	2 years

The durability of the product depends on the substrate's preparation, the atmospheric conditions and the environmental influence. Exposure to extreme conditions (tropical climate, high humidity, high UV-light exposure or polluted areas) can decrease the durability in a dramatically way.
