Features

- Portable, lightweight, and robust
- Overcomes hazards of portable cutting
- No movement of material during cutting
- Guaranteed to cut within 1.0mm (0.004") of a straight-line
- Optional textile cutter
- Ergonomic rocker head for ease-of-use
- Push or pull cutting action
- Immediate out of the box accuracy
- Cutting mat required
- Five-year guarantee

Built to be portable

The Simplex is lightweight and robust and can withstand the rigours of on-site working whilst being truly portable. By manufacturing in-house, with only the highest quality materials, Keencut can guarantee that the Simplex will provide reliable long-lasting and accurate service. The Simplex also has a comprehensive five year guarantee.

The versatile cutter

The Simplex is very adaptable providing the safe, accurate cutting of a wide variety of rigid, semi-rigid and flexible materials up to 3.1 metres (124") wide. The utility blades will cut to a depth of 10mm (3/8"). By adding the optional textile cutter, the material range of the Simplex is extended to delicate materials. There are 5 Simplex model sizes to choose from and a cutting mat is required for safe operation. Please note, the cutting mat is not supplied.

Perfect accuracy

The Sabre Series 2 is designed to provide maximum operator safety for all users in a wide range of environments such as commercial offices, industrial workshops or craft studios. It provides a controlled and measured method of cutting for a wide range of materials, removing all the dangers of using a hand knife. The Sabre securely clamps the media, and the blade is always under control. The automatic blade retraction and safely contained blades also protect the user when placing material on the cutter.

Safety by design

The Simplex overcomes the safety hazards of using other methods of portable cutting. It removes the need for using a hand knife and straight edge where users risk the blade slipping away from the straightedge or overshooting at the end of the cut. With the Simplex the blade instantly retracts when not in use.

Easy to use

Everything has been considered to ensure ease-of-use and reduce user fatigue. An ergonomic rocker style cutting head is designed for left or right-handed use, and the blade can be pulled or pushed, as appropriate for the material being cut.

Five year guarantee

By manufacturing in-house, with only the highest quality materials, Keencut can guarantee that the Simplex will provide reliable long-lasting and accurate service. All Keencut products are offered with a comprehensive five year guarantee.

In the box

100 medium duty utility blades.
