

## PP SPIDER FILM GLOSS LAMINATED 60MIC

### Description:

Transparent cast polypropylene film with PET backing to create an ultra-transparent lamination result on printed graphics. Glossy finish. Environmentally friendly water based adhesive. Also available in matt finish.

### Characteristics:

- Glossy laminate effect.
- PVC Free.
- Water based adhesive ideal for interiors.
- Super light weight.
- No shrinkage.
- No overflow.

### Applications:

Widely used in automatic and manual laminators as lamination film for graphic printing materials. Ideal for inkjet printing, photographic protection, point of sale, catalogues. As CPP lamination film is thinner and softer than PVC lamination, a much lower lamination tension is suggested to avoid curling of material due to overstretching of the material.

### Available widths:

1,07m, 1,37m and 1,52m.

ADHESIVE CHARACTERISTICS	
Type	Water-based pressure sensitive
Initial adhesion	≥14
Durable adhesion	≥24
Peel strength	≥7
Removal performance	Permanent
LINER CHARACTERISTICS	
Storage temperature	20-28°C
Storage humidity	25-50%
Ink support	Negative
Shelf life	12 months
Durability	8-12 months
