

SONICUTTER

Description:

Sonicutter is the best textile ultrasonic cutter. Cutting and welding the material at the same time. It produces a strong, clean cut, preventing the material from fraying. You can cut fabric of different thicknesses, both straight and in different ways even a short role very effectively

Sonomatic is the cutting pointer of SONICUTTER, it has a high hardness and durability, cutting and welding up to 20,000 vibrations per second (it wears by friction so it is considered to be a consumable).

Sonicutter base is equipped with two wheels which allow the movement of the machine with agility. If you adapt a guide to your table, you can move the Sonicutter and cut straight with complete ease.

Includes a cable of 10 meters free standing, which allows great mobility of labour, and a current generator.

One major advantage of Sonicutter is the cutting speed.
