AngelCutter

The perfect knife to cut gaps from about 0,5 mm - 1,0 mm and 1,5 mm. Many thanks for this awesome idea to Steffen Haag.

Available in a pack of 10:
9 mm 30° or 59° and 18 mm 59°

TitanBlades

An extremely thin Titanium-Nitrate coating for extra sharp and even cuts. 10 pieces in a pack!

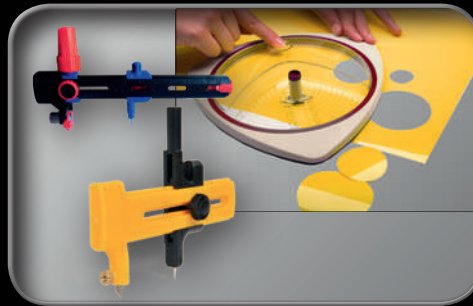

MittmanRuler

Pioneer signmaker Ralph Mittman from the USA (www.printpost.com) said that he would like an accurate cut on graphics and stickers with a millimeter option. **His problem:** If he has a graph, a sticker or a frame directly on its outer line, he can't see through the aluminum cutting edge or the solid material and he wanted something to be able to align easily for a quicker faster job. Here you go, my dear Ralph :) The clever **MittmanRuler** now available in 640 mm, 1290 mm and 1580 mm.

EasyOrbit

Cuts perfect circles in different diameters. With or without middle needle.

FingerTip KnifePen

Looks odd...but you got to try it! It fits perfectly into your Hand. Nothing but fun :)

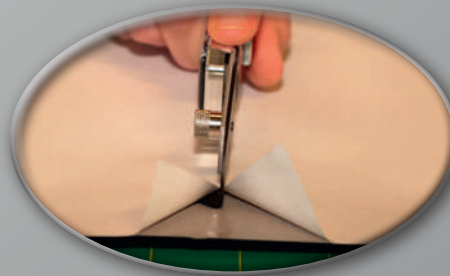

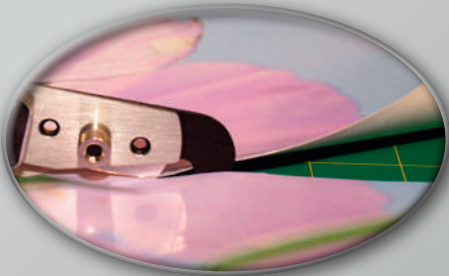

YelloShear Basic

Provides great torque and working properties.

YelloShear Pro

THE one with the „WOW-factor“.

BodyGuard Knife Teflon

Here is how it works: first of all, it's a cool cutter for simple cuts through vinyl or paper but it has another big talent!

Thanks to the design of the teflon coated lower „foot” of the knife, you can easily cut JUST the liner of the vinyl itself. Sounds like a dream, right? Try it yourself, it works just brilliantly!

Our application tip #3 (shown below) - just cut a little strip out of the liner (2-3cm). Now you can align your graphic with ease, stick it on and apply it from the center, outwards.

Honestly:

We LOVE our BodyGuardKnife and you will not want to let anyone borrow yours!

- Improved sliding ability
- Permanent Teflon Coating
- No more Teflon-Shoe replacement
- Combinable as you need it
- No more damages

BodyGuard Knife

This knife has changed an entire industry!

BodyGuard Knife ProTeflon

Ten SpareBlades are stored inside the aluminum handle.

ProTeflon Shoe

The teflon coated foot is the "upgrade" for the BodyGuard Knife.

BodyGuard Knife Duo HD

2-in-1 push AND pull cutting action in one tool. Now with improved angle.

BodyGuard Knife Twin

One complete strip cut with just one move! Many thanks to Ralph Mittman.

BodyGuard Knife Twin Teflon

Also available with teflon coated feet.

LongReach & LongReach RollKnife

Genius "arm extension" great for car roofs.

Available in different versions.

With the unique push AND pull cutting directions.

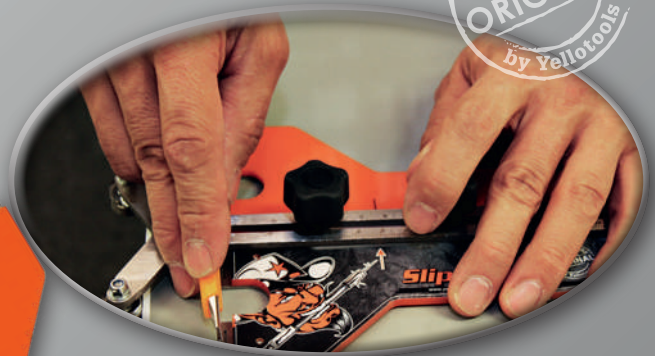

Check out our telescopic versions!

YelloSlip Cut

Cutting the edge of graphics on windows, window seals or also on sign materials is probably your bread and butter. We have noticed due to your reactions from various fairs and events that the request to make a tool to help with this job was very high so our master craftsman and clever thinker **Peter Rötzel** has come up with this great Yellotool!

Our YelloSlip Cut can be used to make distance cuts from 0 - 125mm and more. You can also use it to make marks or trim on substrates. It's the perfect tool for many of your day by day jobs and we are happy to offer this solution!

Switchable Stainless Steel Guide for Inside- AND Outsideframed Surfaces

Easily make cuts with a built in blade guide!

Perfect for Windows and Glassurfaces. Stepless adjustable.

WrapSticks by Yellotools

Many of you have their secret weapons, miracle remedies and life hacks in dealing with hard to reach places while wrapping. Eight custom wrap sticks with unique tool tips in five different degrees of hardness will help you in the future to complete each of your jobs safer, easier and faster.

All WrapSticks are equipped with a hidden, strong holding magnet to safely park them on the vehicle or on the GeckoPatch.

WrapStick Flex Gold, Teflon and Orange

- Flexible elongated tail end
- Easy tucking of decorative strips and gaskets
- Perfect for wrapping PDC or small, round areas
- invisible-integrated strong holding magnet
- Available in three degrees of hardness: gold 72°, orange 82° and teflon 87°

WrapStick Hook DBS by Chad Huhman from cnjwraps.com in Lee's Summit, MO.

- Hook form for pre-forming and fitting film to the door
- L-shaped for strong pressing
- For narrow gaps, trim and door handles
- Teflon Version, 87° shore
- invisible-integrated strong holding magnet

WrapStick Sloan Gold, Teflon und Peekaboo

DBS by Carson from "Art in Motion" in Northern-Ireland.

- Perfect in combination
- Lifting of rubber seals
- Easy laying of vinyl under rubber coatings
- With the extra hard version, the film can even cut under the seal
- invisible-integrated strong holding magnet
- Available in three degrees of hardness: gold 72°, teflon 87° and peekaboo 89°

Both sticks come with a self-adhesive buffer.

WrapStick Betty Gold and Green

- Easy application of film at deep and difficult to reach places
- Special radius (30 degree angle) guarantees a wrinkle-free finish
- Blunt tip for perfect film insertion
- Available in two different degrees of hardness: Green, 40° and Gold, 72°
- invisible-integrated strong holding magnet

WrapStick HangLoose

- 90° and 45° angles finally combined in one tool
- Firm and secure application of films in undercut areas
- Ideal for close-fitting headlight frames, Bodywork gaps or fender joints
- invisible-integrated strong holding magnet

WrapStick Tupp Gold and Teflon

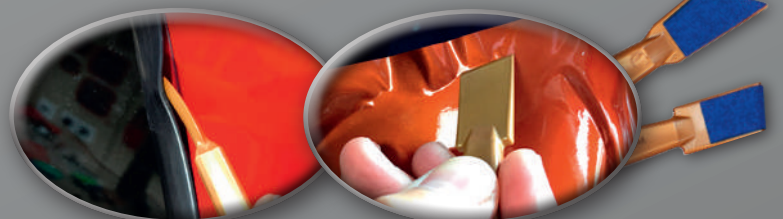

- High pressure in difficult to reach places
- Ideal for interior components, lamps, indicators, grille elements and much more.
- invisible-integrated strong holding magnet
- Available in two degrees of hardness: gold 72° and teflon 87°

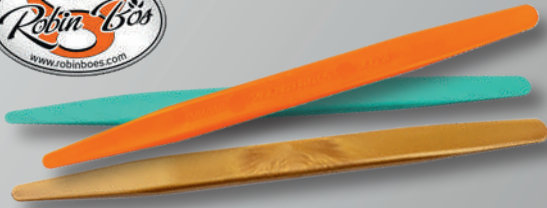

WrapStick Carson Gold, Teflon und Peekaboo

DBS by Carson from "Art in Motion" in Northern-Ireland.

All sticks come with a self-adhesive buffer.

WrapSticks Beavertail

WrapStick Beavertail Gold, Orange and Teflon
