A toolpouch system - as flexible as your daily tasks

No matter if you wrap a car, boat, wall, object, window or building - your tools are supposed to be right where you need them! "Fishing" for tools at the job site is a No-Go. We took the challenge seriously and collected your ideas over the last years and saw the issues with random stock tool pouch products.

The generic tool pouch industry makes no difference between electricians, dry-wall installers, do-it-yourselfer or even signmakers and carwrappers. "One-size-fits-all" is their headline. We can't stand that fact and together with the leading experts, we invented a very exclusive tool pouch system just perfect for our incredible craft.

Especially those of you who work on cars, trucks or boats (carwrap) realized, that plain old pouches are just a "plan B" and suck at some point. As "LEAN-Thinkers", we suffered seeing you guys wasting your customer's money in messing around with pouches, losing time searching for tools. We saw you guys getting angry that tools had to be "parked" in your mouth or in hard to reach places below your waistline. We had to work on that - seriously!

Our brand-new "YELLOGEAR" series is based on the established hook- and loop technology. It's proven for decades by the military and the law enforcement personal. That's why the (so far) 17-piece tool pouch set can be individually constellated or even changed daily for the correlating job task. The possible constellations are almost infinite. The wearing comfort is amazing and the accessibility of your tools is peerless. Please feel free to configure YOUR individual belt- shoulder or carry-on tool bag/pouch!

Of course, we offer you six pre assembled sets which cover the basic needs but even they can be improved, enhanced and changed in the blink of an eye :) You can pick your own dream team - based on your personal preference. With this, you make sure to just pay only for the pouches you would really use. Please keep in mind: whatever you put together - the way to carry or to wear your tools can be changed in no time at all :) It's THAT flexible!

We understand our YelloGear family as a so called "open source" :). If you have any ideas, questions or wishes - please don't hesitate to mail or call us for YOUR individual YELLOGEAR project :)

NEW

Problem: Annoying searching and picking up tools in large unclear pockets.

Solution: No more with the new flexible and practical YelloGear bag system.

- 16. YelloGear ToolBox - 34,90 €

NEW

Put your own individual and flexible set together. Right now!

... or choose between following pre-packed sets:

YelloGear BeltSet Line & YelloGear SashSet Line

With these two sets you keep your tools even closer! Walk around an install like "The Boss Man" or "Boss Woman" and have the comfort and support of a great tool organizing system just for you. Again, the sets differ only in the carrier belt or sash. The standard equipment of the two sets includes MagPatch, Quiver, BigPouch, TripleMini, TriplePouch as well as either the YelloGear Belt or alternatively the YelloGear Sash.

You will get used to the unbelievable wearing comfort in a few minutes and never want to drag tons of heavy "hip bags" with you :)

YelloGear BeltSet Base & YelloGear SashSet Base

These two sets are a good starting base for a variety of configurations. The 9-piece set differ only in the method of wearing.

While the "Sash-Set" can be worn around the torso with a velcro sash, the "Belt-Set" will be around the hips with the velcro belt included.

Thanks to the infinitely adjustable belt, the tool base can possibly be moved forwards or backwards in seconds.

This increases the wearing comfort during working considerably. Of course, the "Sash" is also infinitely adjustable and adapts to any body shape and size. The sets consist of the components MagPatch, Quiver, BigPouch, SteelPatch, TripleMini, SmallPouch, TriplePouch, YelloGear Base and either the YelloGear Belt or the YelloGear Sash.

YelloGear Set „Robin Boes“

Our dear friend and wrap pro Robin was instrumental in the development of the overall concept and he introduces his personal combination. Robin describes the advantages of this set as follows:

My close cooperation with Yellotools now spawned the „YelloGear“ that is as versatile as installers are different. My favorite being the holster-like ensemble. The tools are carried on the breast and are always close at hand. Adaptable for both, lefties and righties, this variety of velcro attached pouches give me the option of carrying just what I need, and have an ideal equipped bag at any time for any job. It does not hang in my way, therefore avoids damaging any paint job. Putting tools back into it, happens almost blindfolded after a few hours of wearing. And even if I have to lay down during my work, no tools will fall out, since I arranged everything in an angle, even downwards to make it more ergonomically accessible. Modern times, new ways, new YelloGear.“

The YelloGear set "Robin Boes" consists of the single elements Sash, Quiver, BigPouch, TripleMini, 2 x TriplePouch, 2 x SteelPatch and YelloGear Base.

YelloGear All-in Set

The name says it all: All-in!
That means "EVERYTHING, please" :)

In this box you will find all components (as of February 2018) except for the YelloGear Clipper. This is included even twice, that way our large modules, like the YelloGear Base or the BigPouch can be used without a belt at the waistband or with your own belt as well. Flexibility is EVERYTHING!

The set consists of: YelloGear Sash, YelloStrap Pro, MagPatch, Tape Holder, Pocket Black, Quiver, BigPouch, SteelPatch, TripleMini, SmallPouch, TriplePouch, Base, PocketClear, Belt, 2x Clipper, ToolBox.

WrapSwivel to-go

Holds exterior mirrors while wrapping. Comes with bag and all necessary tools.

SnugPad

For those who have to kneel down a lot, we came up with five different sizes.

RubberLift

The perfect car wrap tool to lift rubber gaskets. No scratches and no holes.

WrapSwivel „Bench“

Even motorcycle helmets and other objects can now be wrapped pretty easily.

WrapTower

Are you still searching for your professional Car Wrapping tools before every Vehicle Foiling job? Do you pack countless bags and after the work is done, the tools disappear again at undefined places?

This has finally come to an end with our WrapTower PowerPack - probably the most flexible tool trolley far and wide :)

Whether Signmaking technology or Vehicle Foiling - here is everything what your Carwrapper heart desires!

With the WrapTower PowerPack you no longer need to think about what you need, because we have really packed everything, so you are from the beginning really brilliant equipped.

The shopping advantage with this package is over 250 €! Find more informations under www.yellotools.com

WrapLaser Set

When Car Wrapping or mounting signs in Signmaking Technology, marking lasers have long been used to align films (Yellotools patent ...!).

But never before was this in the professional Vehicle Foiling so cheap! Thanks to the "WrapLaser Set", a straight laser line becomes a miracle weapon of the Signmaking Technology with the blink of an eye.

Due to the parallel shift of the highly visible laser line, your freely selectable reference line always moves perfectly straight across any shape, whether car, trailer or advertising column.

This set consists of:

- 2m Profile
- Platinum Laser
- Laser Tray
- Baseplate
- WrapTower Twister
- 3x Stopfix

PreStrech Meter

Get the answer for the stretch factor for your vinyl immediately!

TemperScan

Perfect-shaped Tempscanner to click on your WrapGun II.

WrapGun II

The first true wrap heatgun with a 5m, heat-resitant cord. 3 years of warranty!

GladiBelt

A sturdy leather and metal heat-gun holster to keep your heat gun ready to go.

WrapGun Mag + WrapGun Mag II

Stop loosing time while putting tools away and grab them again all the time! You will love to work with it.

YelloShuttle I + II

Measure temperature and apply heat with this new heat gun adapter.

WrapJet EasySet

Goes anywhere, has no cord to hold you back and the heat is instantaneous.

StrikerSet – in its new guise!

For removing car parts we put together this nice tool set for you. For doorpanels, trims or doorhandles - this 27 piece toolset helps you to get your job done perfectly.

LowRider

all-in-one "seat" for the optimal position when applying car-wraps. The idea was to take a "shop stool" and turn it into a car-wrappers work dolly.

Available in three different heights.

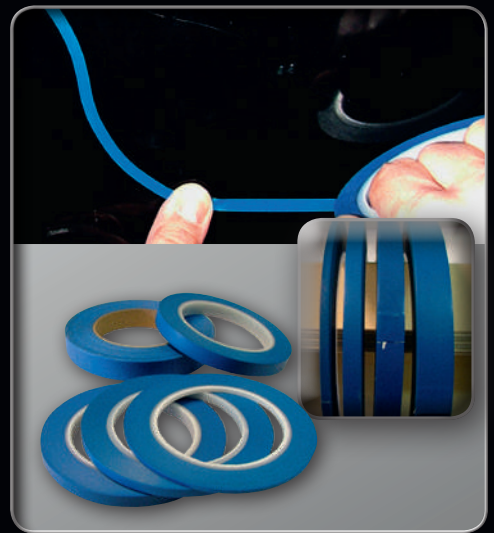

LowRider Extension

Extensions for LowRiders in different heights: 15 cm, 25 cm und 40 cm. Hight without extension: 12,5 cm

YelloOpen

Tired of holding liftgates while wrapping? Use this extra hand and give your back a break! Available in S= 30-40cm, M= 40-60 cm and L = 70-120 cm or as complete set.

FineLineTape

After years of testing these are the best! That's why they are available for you! Available in different sizes: 3 mm, 6 mm, 9 mm and 12 mm x 33m length.

FineLine Dispenser Base

The Signmaker-specific maskingtape dispenser. The optional available Magnet-Basepad and powerful X-treme mat parks the dispenser also right on a car.

TaperClip

You can fasten all kinds of 3"-cored tape rolls right on your belt or waist-band.

YelloGloves

Our specially developed nylon mesh sign and carwrap gloves. Available in M / L / XL

GloveMaxx ProWrap

More information on page 5

GoveMaxx ProWrap

Special glove for CarWrappers with "Wet-Feel". Available in three sizes: S / M / L

Made in Germany
ORIGINAL
by Yellotools

WrapWalk

Maybe the most flexible platform system for car wrappers. All different sizes are combinable. Even if you stack them high, they still create a strong grid.

WrapFinger

Cover just one finger for gliding over vinyl to give the right pressure to it!

WrapStep

Finally a ladder for every car wrapper!

Available in two sizes.
