

# MagTape Ruler

## MagTape Ruler

Do your glas window magnetically

We´ve designed a 40mm wide springsteel blade with an easily readable scale and our "magic" X-treme mat, to align prints, graphics or plotted vinyls onto non-magnetic surfaces, like shopwindows, plastic fenders, aluminum cars or trucks and much more.

Now you can use our SpeedMags to do this kind of work, rather than annoying masking tape or an expensive second pair of hands.

MagTapeRulers are available in 25 cm, 50 cm, 100 cm and 150 cm. We are the manufacturer - so all other sizes are no problem at all. Just give us a call :)

## FixxSignScale

The perfect mix between a tape measure and a folding meter stick. The blade of the FixxSignScale lies flat on the surface and won´t bent down even if you pull it out a meter. 3m long

## FlatSignScale

Absolutely flat and flexible tape scale. The surface is rewritable (dry erase). Integrated pencil sharpener and Beltclip. Length: 5m.

## MagicSticks Plain

All-steel ruler with a good readable scale on the frontside. Optional available with an additional marker strip. (MagicStick Mark)

## MagicSticks Mag

All-steel ruler with a good readable scale and genius magnetcoating on the backside. It sticks to all magnetic surfaces and is perfect for marking and measuring..

## MagicSticks X-treme

Due to that awesome capillary action, the Ruler sticks on all flat surfaces as if by magic :). Available in different sizes.

# DigiSignScale

Half of 37,4 cm – well, that's 18,7 cm

Isn't that simple? But what if you're standing on a ladder and under pressure with a deadline and you still have to mount 10 more signposts quickly in your customers new snack stand? We've been there and we know that a simple measuring mistake can ruin an entire job and make all your work uneven or un-centered. Our dear customer Brendon Kilah of Sign Attack Signs in Australia ([www.signattack.com.au](http://www.signattack.com.au)) asked us for a remedy. The solution is in our all-electronic measuring tape **DigiSignScale!**

Simply extend the measuring tape to the desired length (the measurement appears digitally and legibly on the built-in display) and at the touch of a button the measurement is divided in half! **Absolutely fast and error-free.** In addition, you can decide whether you want to have the measured value from the measuring tip to the beginning of the measuring tape housing or the back end of the device. You can also perfectly measure the length of an inner frame of a shop window pane and find the center measure with the touch of a button. You can also save two measures with built in memory options and change from inches to feet or even centimeters.

**We found a perfect YELLOTOOL !**

Whether you're measuring from end to end...

...the inner dimension of a frame...

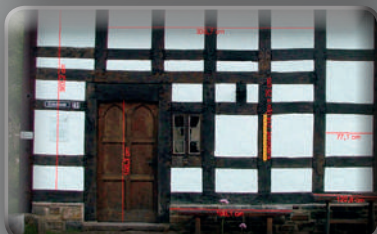

At the touch of a button, you will find the middle!

# E-Scale

Don't you also hate these senseless Measuring-Trips to „potential“ customers, which you already have a bad feeling about? If you really don't get the job after hours of driving and measuring - the whole thing turns into waste. Now, you can avoid MUDA like this: With E-scale, you can send this customer one of the „Reference-Strips“ (ideal with your Logo on it!) and ask for a picture with it on the object in a mail. Now, you can measure the entire object front with ease and simple from your Signshop. If you get the job: Great! If not: You still earned money! It is really as simple as it sounds. The accuracy of e-scale is absolute great for an Estimate!

Have fun at your next relaxed „Measuring-Job“!

# EasyNooks / YelloDistance Check

Many thanks to the guys and gals from the Mega-Team Knirsch Beschriftungen ([www.folien-kleber.de](http://www.folien-kleber.de)). In the alcohol-infused atmosphere of the late hours in the night they shared a few of their mounting secrets :)

The **EasyNooks** e.g. - two 90 degree curved steel angled mounts, refined with our X-treme Mat - they add here perfectly on the right and left of the interior of frames and you can simplify the measurement of the area with our laser distance meter, YelloDistanceCheck.

**Thank you for your passion !**

Also available: Laser distance tool **YelloDistanceCheck**

### YelloCase

YelloCase, the ultimate tool portfolio for Signmakers. Completely filled you can save over 20% discount compared to the single purchase. Length: L = 28 cm x W = 19 cm x H = 6 cm. Also available unloaded for 29,90€.

### SignToolBox

Super strong doublestitched nylon, with reinforcing rivets, carries a big load and holds up to years of heavy use. Dimensions: L = 19 cm x W = 23 cm x H = 9 cm

### YelloBelt ProWrap

Belt-pocket specially made for professional CarWrappers and Signmakers. Without any rivets and eyes which can damaging the varnish. Multifunctional carrying option. Dimensions: L = 17,5 cm x W = 18 cm x H = 2,5 cm

### YelloBelt

Super strong doublestitched nylon, with reinforcing rivets, carries a big load and holds up to years of heavy use. Dimensions: L = 19 cm x W = 23 cm x H = 9 cm

## YelloStrap PRO

**DBS - PRODUCT**  
Designed by a signmaker!

Have your tools right where you need them!

The all-new YelloStrap PRO comes with Velcro-Applications AND strong magnets built in the Strap. Now you can stick whatever tool you want totally flexible right on the Band.

Wear it at your wrist, your arm or even at (smaller) upper legs :) Comfortable to wear, easy on-and-off, durable and cool-looking. Of course, you can attach all applications of our YelloGear Program.

**ONLY WHILE STOCKS LAST!**

**YelloPouch**

You got a knife - you need a pouch! Real leather with belt clip.

**EasyCord**

The cord has a quick-release for un-tethering your tool.

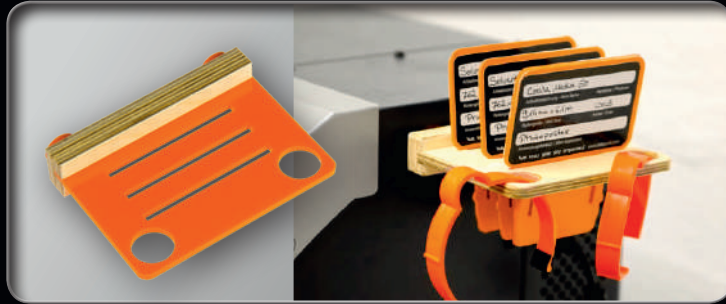

**ProHold**

Wrap it around your arm or your drill to hold your bits and drillbits!

**MediaCards**

Perfect order and great visual control for your vinyl stock. Available in 3" and 2"

**LeanMedia Mag**

Holds your SpeedClips and MediaCards while the roll is in your printer.

**MediaLid**

Solid wooden tube insert with rewritable labeltop.

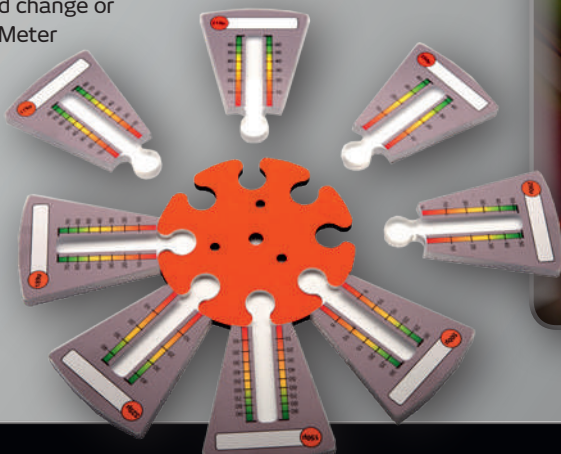

**MediaLid Wallmount**

To "park" your MediaLids if the roll is at your printer or plotter.

**MediaMeter Star**

The function is really simple:  
 Just plug the unit in a core of a vinyl roll and read on the scale how much vinyl is still left on the roll. It's really that easy. The best part of our improved MediaMeter Star is, that you now can easily put together your individual scale-set online. The single „wings“ are interchangeable.  
 Just unscrew the upper lid and change or extend your individuell MediaMeter as often as you want :)

Of course you can also order the wings separately!

## SpeedClip 2.0

Fast, clean and easy storage with our amazing Speed-Clip. These genuine clips are in two sizes available: L (orange) = 78mm mainly used at plot medias and thinner rolls. XL (yellow) = 111mm Diameter perfect for banner material and print medias. **THE ORIGINAL** – made in Germany! Bags are also available from 50 pieces a bag.: 50er L = 45,00€ and 50er XL = 55,00€

### YelloBench Basic

A compact, rigid and expandable Signbench with all the known „Yellotools-Gadgets“. The worktable is dismantable and comes with brackets for your SafetyRuler.

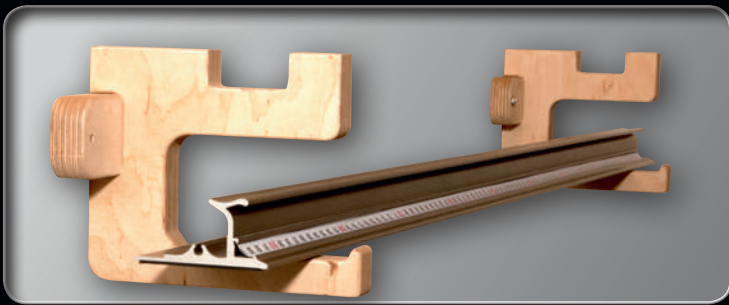

### YelloBench to-go

A useful worktable "to go". Rigid, solid - not one of these cheap pasteboards.

### YelloBoard Rack

Available double-sided or as space-saving single sided wallmount version.

**LeanRuler Bracket**

The perfect tool to park your SafetyRuler. Available as wall- or desk mount.

**MediaFlipper**

One of the most annoying jobs is it to swivel rolls from vertical to horizontal. With this helper it is very easy to remove the plastic lids from the rolls e.g.

**YelloLedge 5 & 10**

Our squeegee organizers either for five or ten squeegees.

**YelloSpare Brackets**

One for all – either wall mounted or even under your table.

**BoostBox Bucket**

If you don't have the space for BoostBox Eco, you will love this smaller version!

**EasyMedia Lift**

The easiest way to lift an upright standing roll is our EasyMedia Lift - try it!

**YelloSpare Wall**

The YelloSpare Box for wall mounting - also available as flexible dolly cart.

**YelloSpare Rack**

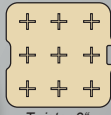

Designed to host ten coreless filmrolls. Works great as wallmounted rack.

**YelloSpare Box**

Due to this smart construction, you can store up to 28 coreless Rolls.

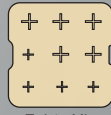

Following selections are possible:

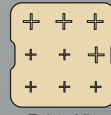

Twister 3"

Twister 2"

TwisterMixx

## VertigoRack-SYSTEM – The MODULAR concept for roll-media storage

Probably the largest, most innovative and flexible rollmedia storage-system for Signmakers and digital printers at all!

Whatever you want to store - how heavy, how long, how thick, how distanced from each other: The VERTIGO is ready for all of your tasks! It may look a bit tricky, but it's not! The system simply contains the system-bars and the adjustable vinyl brackets. That's it. These brackets vary in their purpose - depending how you want to store. On the next page, you will get a closer introduction to the different uses of the arms and their function. Of course, you can mix all brackets like you want. Whatever your shopfloor requires - the modular concept fulfills all your needs and it grows with you and your success. All you need right now are some meters of the special bars, some brackets and you are good to go!
