

CONTOUR MATCH 70100

Efficient automatic cutting equipment. The system processes the vector graphics and converts them into cutting lines. The equipment is equipped with a variety of cutting tools, so that it can complete creasing and cutting on different materials. automatic intelligent cutting system is suitable for cutting the following materials: self-adhesive materials, cardboard, KT board, PP plastic, corrugated board...

Product size	2540*1100*1100M	Working range	1000*700MM
Weight	500KG	Vacuum Pump	2.2KW
Safety Device	Using infrared sensors, responsive, safe and reliable.	File Form	PDF, PLT, DXF, HP/GL
Cutting Speed	0-2500MM/S (depending on material density).	Translational Velocity	800-1300MM/S
Cutting Thickness	≤6MM (according to different materials).	Repeated Accuracy	≤0.1MM
Transmission System	Imported (Digital servo motor, linear guide, belt).	Instruction System	HP-GL compatible format
Voltage	220V/380V +/-10%/50HZ	Tool Configuration	Multiple cutting knives
Multifunctional Head	Oscilating knife cutting tool, drag knife cutting tool, V cut, crease wheel, marking pen and CCD camera.		
Cutting Material	PVC board, PP board and white card paper, cardboards, paper, PVC, film, sticker, etc. The maximum cutting depth is up to 20mm, depending on material density.
